XXIX YEAR

XXXIX YEAR

kely to fall through owing to the apathy of the British public in the matter. The fact of the matter is that the Government are giving them a good start in life is grand and worthy of the spirit and Cooperation of every British subject in the country, and it is to be pitied that the endeavors of the few of our nation have received such scant support. A meeting to discuss what could be taken with regard to the families all at the Home, and those now on the way out, and to come, will be held at the National Council of the Home, at 8 p.m.; it is to be hoped that anyone who can attend will do so.

In answer to a correspondent, F. L., who writes, "We know when Ormonde will leave, we are waiting for him to be met here by his wife, but he will not be here before July, if then, next Day, who arrived on Tuesday per motor, before coming, receiving a splendid reception at once, and arriving Ormonde with his engagements, however, he will be here."

will do in very few years more, there will not the slightest chance of strong evidence (the poor dealer) horses being used in the future, and the poor Cavalry del pal's is no cheer.

A probable duel between two young officers of high rank was spoken of yesterday as likely to come off to-day.

A young named Oatley tried to cut the throat of his sister once the other day in the street, but was stopped by a policeman. Rosario by taking a little other day in before dinner, but it disagreed with him so much that he gave tongue for the doctor, and he arrived in time. Two much sister-in-law in the family led to the attempt.

We must plead to be excused for not publishing a rather ungrammatical essay on the weather from an anonymous correspondent, who writes, "The weather has been born with long of the people and who is, evidently, not sound in the head."

from accepting. We fully share our correspondent's enjoyment of the other which has, as he states "never come into the same"; but his letter goes into the w. p. all home! The increasing flow of immigrants to the United States has procured us a large number of anonymous correspondence of the most varied kind, of the very slightest public interest.

The lame, the halt and the blind are still trying to come here from Europe. The capital of the Argentine Republic, Buenos Aires, has been fined 100 and 200 dollars for the immigrants of this superfluous character across the ocean.

The autumn ball-playing season will soon be over. It continues on Sunday next. It is said the ball-players will then amalgamate and play all through the winter. Ball-playing and racing are now as necessary permanent amusements for the people, gay and gaudy as the population of this city.

There are in the United States no fewer than 563 manufacturers of patent medicine, and 108 are in the State of New York alone.

This is expected to be the coldest winter in a social way, known for a long time in this city, all, or nearly all, the leading

and that through rough weather on that occasion. All interested in the fate of the stock will take up hats to the D. C. and the prospect of wearing a fresh feather in his cap.

Daniel Danaher wishes to find his sister, Catherine Danaher, who hired as a servant somewhere among Ayres. He is very anxious to find her residing in the British colony near the mouth of the river. The name of the employer's name is Mrs. Moran, but he has lost the address.

The Minister of Hacienda has issued a new ordering new organization of the "ampulados" nominated by the Government in order to ascertain the precise, as quickly as possible, the date of the debts of the "Contribution" and "Patentes," the accounts of have been found to be in a backward condition.

Going to the Paris Exhibition, and their knowledge of the exhibition, the economic situation of the country, the opera houses. Nevertheless, enough of the nation will be left in town to keep them going mildly.

Roast mutton is getting scarce in Entre Rios.

An epidemic amongst sheep is raging all over the country, and is particularly virulent in the districts of Guayaguay.

The Empire of China appears to be in a terrible hard-up just at present. The approaching marriage of the youthful Emperor will cost only two millions sterling, which some London bankers have been asked to advance. There is not a red, yellow, or green fat in the Imperial Treasury of the Land of Pitalais.

The papers contain with an English name (I named Oliver?) who was captured 60 nates, the other night while enjoying his usual nocturnal slumber. Judging from the intense difficulty we have expe-

retired. He has been employed by Charles Jones, and Don Torcaso who has been nominated Secretary of a department.

Now stated that Congress will not pass any bill until the 4th. The Deputies announced for a preliminary carerow.

"Traveler's" note about the delay of the "Agus" from West of coal is, as they Ireland, "a day after the fair". The "Agus" gone home full and will be back with a little less coal in the hold.

"Traveler's" suggestion that R. M. should have a coal depot at an excellent one. The "Royal handle" referred to by our correspondent is of considerable value to the man who has a handle to a man's worth. 1

referred in pronouncing the name of the "Agus" are inclined to think that there is a mistake in the nationality, and that he must hail either from the Balkans or the Flowery Land.

The City Patrons have given the contract for advertising on the street lamps to Mr. Ramon Miller, who pays \$2500 a month, and will probably net \$6,000 a year on the business. He will, however have a bright prospect, as some other advertising Richelieu holds a concession granted to him some time ago for one hundred dollars a month (How could he lose the C.P.'s. look after public interest) Mr. Miller therefore, though triumphant, will be Millet militant if the dogs of law are let loose on him. Perhaps the Lord Mayor will veto the whole business.

The Grand National is going to start

business circles—at least so it is
the Argentine torpedo-boat
Number One—are going
to be a little more than a
No doubt they will take care of
One.

Rowing Club held an "extraor-
dinary" Tuesday night. Dr. Teidin
was present. The object of the meet-
ing was to make up a loss of 2,400 nates, in-
volved on account of the Club who
had been that amount, spent it, and
it listed in the Argentine. It was
to collect \$5 a head from the
to cover the loss, and to raise
sufficiently subscription ten to
the Argentine.

porting friends of the Rowing Club
expressed as Puch at the rapid
rise society is taking. New mem-
bers are every day, and the new boat
is being completed. The "Capitan"
the "Captain," says Rose from
employees and horses foot the year

the old Fort Marlborough on the site of the
old Fortin Club in Culla Kura, which
it had rented until the year 1902.
A five-story building will be erected on the site.
The Company have already been offered no
less than 100,000 shares, for their contract
but have refused with a beating smile.

John Jacob Astor is called the richest
man in New York to-day, his fortune,
which is mainly in real estate, being esti-
mated at \$100,000,000. He is about 70
years of age and a widower.

OUR ENGLISH MYSTERYMEN

There are not less than about half a dozen
being tried in the public trials of Buenos
Ayres and La Plata. They are all
put there without a trial, hardly with
a knowledge why they are taken and so
dealt with. Now these English murder-
ers are being sent to the Azorelands
and the Southern Railway. The per-
formance of their duties they came in con-

of course we do not believe in violence. At the same time, however, we have a high opinion of the value of the use of force in the line of his profession. He has been paid for \$20,000 to the Government of the United States, for attending cholera patients, for the purpose of which he was refused payment of such sum. The Health Board has been told that he once reduced the fever in which is present, and that he is beginning to find out, or rather to begin to find out, in the Santa Fe Colonias that the maize crop has been lost, and that the prices are going down. It is the colonists of Esperanza who are the victims of his savagery. The Banquet Committee hold a meeting this evening at 8 o'clock in the Field. In giving the names of those yesterday we omitted to mention the names of the following with careless men. For instance, in the excitement which occurred at Barracas al Norte, the unfortunate man who was killed was not the one to be held responsible for the outside train that was running at the time that the accident was happening for the platform. After taking his leap, finding himself hemmed in, the man stood stunned right in front of the engine. No earthly power could have moved the engine at a distance of a few inches.

For this very act the driver was taken and placed in jail, to await the pleasure of the public servants. This fact will show the nature of the results. What is murder? We believe the Civil Code defines it clearly. If we say that the police have not the least conception of what it is, we are wrong. When drivers in the performance of their duties are unfortunate enough to kill a man they are taken, and not a moment is

to my father and Mr. Th. M. de Almeida. Mr. Th. M. de Almeida was president, and Mr. J. Nelson informed that Mr. Maidneof, of Brazil, gave a very hospitable reception at his new establishment in the night. Dancing began and was kept up until 12 o'clock, when the English, Scotch and German predominating. At midnight the dancing ceased, and the host was served, and the host was escorted.

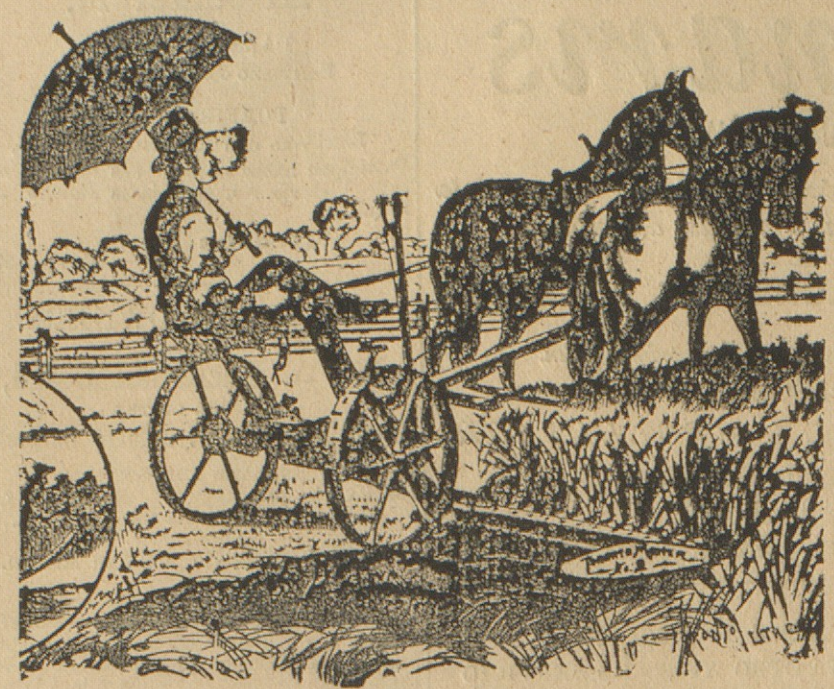

I request our two numerous friends on the subject of *Oleary to the horses* to give us *passos* of *horseries*, hailing from a popular city, and whose pet were *Belgiano* *Tramway*, which, we very cruelly induced to his horses, as they than the other company, we had a great deal of trouble.

against the shocking cruelty to this city: but frankly confesses a little hope of reform till the motor appliances horses, not only yats in carts and heavy vehicles, as we believe and hope it power exists, but how it is acted upon we are in ignorance. But better than anything would be a strong movement, in favour of a change in the law dealing with these matters, and having careful definition of this point.

W.

The "Toronto" Differential Gear Alfalfa-Mower.

The most modern invention.

Guaranteed the simplest, strongest and lightest draught machine yet introduced.

NOTE—The driving arm of this famous machine is only 7' long, and consequently not liable to twist, as often happens in machines of other makers.
